ABOUT KBA

We are a full service architectural firm that prides itself on delivering innovative projects within budget in a timely manner. Services include site assessment, master planning, schematic site and building rendering, space planning, building design/construction document production, contractor procurement and construction administration. We concentrate on commercial projects related to Civic, Educational, and Industrial facilities.

Mr. Bryan is a registered professional architect in the state of Louisiana, Texas and has filed for licensure in Oklahoma. Kevin Bryan Architect (KBA) opened its doors in 2001 after working for nearly ten years in the Shreveport Bossier area. Since that time we have produced numerous projects for both private and public clients including the State of Louisiana, the City of Shreveport, Caddo and Bossier Parishes School Boards, The Caddo Levee District, The Port of Shreveport Bossier, and the Federal Government. KBA currently holds the 5 year IDIQ Federal Design Contract with Barksdale Air Force Base and has done projects for the FDA, FBI and ATF. We also designed the local office for the 2010 Census Bureau. We understand the special requirements of government design, bid, and construction processes, and we strive to make that experience as hassle-free for our clients as possible. We also understand the demands that private projects involve, often due to the need for a building to help start generating revenue for our clients. We endeavor to work promptly for this reason while maintaining careful control over the design and construction process.

WORTH NOTING

Kevin Bryan Architect won Shreveport’s Small Business of the Year in 2006.

We are the first and only Architectural Firm to deliver a fully Gold LEED Certified building in North Louisiana, and it is only one of a few in the entire state. The Gold LEED project was for the Port of Shreveport Bossier and is their new Regional Commerce Facility. The facility houses the Port staff offices, The Commissioners Board Room, a 300 person Presentation Room with full Commercial Kitchen, two HD Video Conference Rooms, and an Emergency Operations Center for the Port of New Orleans and Lake Charles.
